About this Directory

The Haitian Medical Directory is based on work done by Lori Moise (www.thehaitinurse.com). She works in the village of Cazale, about 2.5 hours north of Port Au Prince. She has given me permission to use her work and update it for distribution.

Contact names and numbers are constantly changing. Please send any corrections or updates to

Jrigdon@ngohaiti.com

Community Hospital is Hopital de la Communaute Haitienne, Rue Audant off Route Frères. People should get information about hospital capacity before moving patients. I have been at Hopital de la Communauté all week and we have have mostly major orthopedic surgeries here. We tried to move some people out but in fact we've been told that we have the best care for major orthos around PAP. We tried to pass on some cases to Margaret Degan and they were refused. Please get info before you move people.

We have received lots of help from teams from the DR, Miami, France. A Swedish team arrived last night. Patient follow-up is a big problem because people move to the outside of the building when there are aftershocks We need crutches, walkers, back boards, mattresses, beds, wheelchairs.

The big problem is blood availability. The red cross is down. I found out that Laboratoire National, next to Hopital La Paix in Delmas 33 has blood.

thousands of citizen have lost their homes and are still awaiting help at the Hospital Notre Dame.

Here are some facts:

1. More than a 1,000 patients are in desperate need of surgery.
2. Lack of gas to run the generator at the hospital.
3. More than 1/3 of the 120,000 people have been affected by the earthquake.
4. Mayor Justal Marc Roland and other city officials are pleading for help: food, water & medical care are needed.
5. Power supplies were cut off and communications towers were destroyed as many

buildings, including historical icons like Notre Dame Church, Hotel Le Relais, Pharmacy Caymite, Primary School Sacred Heart, and College of Petit-Goave .

6.The city urgently needs help to remove hundreds of corpses that remain unclaimed and which are literally piling up in the streets as people are afraid of epidemic diseases.
